

Dear Directors,

When you can, please review the GSP topics below and if you feel you have relevant/valuable information to provide, please take the time to provide the information via email, hand-written, or however is convenient. If you know others who are likely to have information to contribute, please forward this request to them. The information received will be reviewed and synthesized by Greg Hinds for inclusion in the GSP Concept Document where applicable.

- Descriptions of conjunctive use programs (surface and groundwater use - conjunctively, descriptions, details, volumes, etc.; the biomass plant; Loylton's wastewater reuse, etc.)
- Conjunctive use/water use description for the biomass plant
- Descriptions of Loylton's wastewater reuse
- Underground storage (tanks), descriptions and quantities, locations/volumes
- Groundwater contamination cleanup, conservation, water recycling, conveyance descriptions
- Water conservation
- Water recycling
- Water conveyance descriptions (location, size, length etc. of irrigation ditches; water source to the ditches; whether it is controlled by watermaster)
- Description of your water rights.
- Efficient water management practices; irrigation practices descriptions/technical information
- Irrigation practices descriptions/technical information
- Relationships of stakeholders with State and federal regulatory agencies
- Land use plans and efforts to coordinate with land use planning agencies to assess activities that potentially create risks to groundwater quality or quantity
- Any information regarding impacts to groundwater dependent ecosystems"

Thanks!

- Greg Hinds
