I do not have a contract amendment form ... hoping Tracey can provide? The extra work requested is for the following three items:

1. Install one 8" flow meter at Roberti Pivot #13 at the pivot point (meter, grounding rings and gaskets to be provided by SVGMD)
2. Install one 8" flow meter at Roberti Pivot #11 at the pivot point (meter, grounding rings and gaskets to be provided by SVGMD)
3. Install one 6" flow meter at DMS-66 (Potter) well head (meter, grounding rings and gaskets to be provided by SVGMD)

Unit cost for YourH2OPro for each installation is \$3,980.00, as per the email from YourH2OPro dated April 8, 2022, for a total additional to the contract of \$11,940.00.

Thank you,

Dwight L. Smith, PG, CHg
Principal Hydrogeologist
McGinley & Associates

Subject: RE: THREE Additional FLOW METERS

Happy Friday!

The information to prepare the change order is as follows:

Roberti pivot # 11 \$3980.00
Roberti pivot #13 \$3980.00
Potter #66 \$3980.00

We will order the material ie flanges & bolts and as mentioned in a previous email the flow meters, gaskets, & grounding rings are already on site correct?

Let me know if you have any questions.

Have a great day!

Kerri Flynn
